COLBÚN AND PUELICHE FRESH COMPANY AGREE TO SUPPLY RENEWABLE ENERGY

The contract signed between both companies will allow the supply of energy for the operations of the Puelche Fresh plant in Los Ángeles, Biobío Region.

This is 5-year contract and will cover a demand close to 0.8 GWh / year which will be supplied with renewable sources. This agreement materializes the objective of Colbún S.A to contribute to the energy development of the country with safe, competitive, and sustainable energy.

Fernando Wittwer, General Manager of Puelche Fresh Ltda. declares that "As a company we are committed to caring for the environment, and we are proud and happy to add a new achievement that allows us to continue advancing in our policy of respect and responsibility for the environment. This achievement strengthens our company and encourages us to continue caring for nature and the products it offers us. "

Thomas Keller, General Manager of Colbún says that "It has been several years Colbún since made the decision to enter the free customer market and an agreement of this nature encourages us to continue recognizing that we are capable of delivering clean, safe and sustainable energy."

ABOUT COLBÚN AND PUELICHE FRESH COMPANIES

Colbún S.A is a Chilean company dedicated to the generation of electricity. With 25 generation plants in Chile and Peru, it has a total installed capacity of 3,811 MW distributed in different types of generation technologies. The company also owns 899 kilometers of transmission lines.

Puelche Fresh Ltda. is a company dedicated to the processing, marketing and export of organic and conventional fresh fruit. Cold Rooms and Controlled Atmosphere and an optimal control of the cold chain before the fruit is packed allow them to manage and ensure the quality of the fruit at the destination. Its main destinations are the USA and the EU.
